PROFESSIONAL SUMMARY

Senior frontend developer with 5+ years of experience building production web and mobile applications with React JS, Next.js, React Native (Expo) and TypeScript. Rebuilt the company mobile application from scratch in React Native Expo and delivered it to production, and has led the complete redesign of core company dashboards. Manages server state with TanStack Query (React Query) and client state with Zustand, consumes REST APIs with JWT authentication, and adds real-time features with Socket.IO. Builds reusable components with Tailwind CSS and Shadcn/UI, uses Figma, and works with Git feature branches, structured pull requests and code reviews.

TECHNICAL SKILLS

Frontend (React): React JS, React Native (Expo), Next.js, TypeScript, JavaScript (ES6+)

Mobile: Expo Router, React Navigation, i18n/react-i18next, Luxon, QR Code, PDF generation (jsPDF, Puppeteer)

State & Data: TanStack Query (React & Vue), Zustand, Redux Toolkit, Pinia, React Hook Form, Zod

APIs & Backend: REST APIs, Axios, Ky, Socket.IO, Node.js, Bun, JWT, Firebase

Styling & UI: Tailwind CSS v3/v4, NativeWind, MaterialUI, Framer Motion, Figma, FontAwesome

Dev Tooling: Git (feature branches, PRs, rebase, merge), ESLint, Prettier, Biome, Husky, Lefthook, lint-staged, CSpell, Vite, pnpm

AI Dev Tools: Cursor AI, Claude AI — prompt engineering, code generation, debugging acceleration

Frontend (Vue): Vue 3 (Composition API), Nuxt 3, Vue Router, VeeValidate, Reka UI, Radix Vue, Shadcn/UI

CMS & Platform: WordPress, Elementor, Power Automate, Power Apps, SharePoint, Office 365

WORK EXPERIENCE

Senior Frontend Developer

Parcel Information Technology | *Apr 2023 – Present*

- Rebuilt the company mobile application from scratch in React Native Expo with NativeWind, Zustand, and Expo Router — delivering to production with full platform guideline compliance.
- Architected and shipped multiple production applications across React JS, Vue 3, Nuxt 3, and React Native Expo — including a B2B SaaS web platform, a customer-facing Nuxt portal, and a cross-platform mobile delivery app.
- Led complete redesign of core company dashboards using Vue 3, TanStack Query, and Tailwind CSS, directing the frontend team and improving user task completion rates.
- Integrated real-time features via Socket.IO and multi-language support (i18n) for a multi-market product rollout.
- Maintained a feature-based Git branching strategy across multi-developer teams: creating scoped branches per ticket, raising PRs with structured descriptions, conducting code reviews, and rebasing branches before merge.
- Leveraged Cursor AI and Claude AI to accelerate feature development, automate repetitive code generation, and improve pull request quality — reducing average feature delivery time by 25%.
- Drove component-level QA and accessibility improvements (eslint-plugin-jsx-a11y) within Agile/Scrum sprints.

Software Developer

The Design Hammock | *Jan 2023 – May 2023*

- Built and shipped a B2B application with a React JS frontend integrated against custom backend APIs.
- Collaborated cross-functionally in a fast-paced agency setting to translate business requirements into clean, maintainable TypeScript code.

Software & Web Developer

Pavilion Renewables | *Aug 2021 – Mar 2023*

- Built frontend features across company web platforms using React JS, integrating third-party APIs and producing spec-driven, maintainable code.
- Integrated custom APIs for live data display on website cards; managed hosting migrations (local-to-cloud, cloud-to-cloud) and website analytics reporting.
- Monitored and enhanced internal dashboards, maintained application servers, and contributed to IT operations including server administration, VM setup, and network configuration.
- Developed and delivered 4 company websites from planning to live deployment using WordPress and Elementor Pro, completing the first in 27 days and subsequent sites in under a week each.

IT Intern

Euro Motors | *Jun 2020 – Sep 2020*

- Built an automated requisition approval system using SharePoint, Power Automate, and PowerApps — eliminating the manual authorization process company-wide.
- Managed IT inventory, procurement requests, and vendor scheduling for the department.

EDUCATION & CERTIFICATIONS

Bachelor of Information Systems — University of Bahrain | 2015 – 2021

CISCO Certified Network Associate (CCNA) — Aptech Institute, Zinj | 2021

LANGUAGES

English — Fluent • Arabic — Spoken

NOTABLE ACHIEVEMENTS

- 1st Place Winner — Injaz Bahrain Innovation Camp, Business Plan category (2019)
- Participant — Injaz Insurathon 2019
- Active participant in Amazon Web Services (AWS) technical seminars
- Supervised operational teams at Bahrain International Circuit for Formula 1 Grand Prix events (2018, 2019, 2021) under the Royal Court Crown Prince division
